SUMMARY

Final-year B.Tech (AI & ML) student with hands-on experience building AI-powered business automation systems using LLMs, Retrieval-Augmented Generation (RAG), OCR pipelines, and workflow orchestration. Experienced in developing end-to-end AI applications with Python, FastAPI, LangChain, and modern AI frameworks through startup and industry internships. Passionate about solving real-world business problems using practical AI solutions.

EDUCATION

LNCT University

B.Tech in Computer Science & Engineering (AI & ML)

- CGPA: 8.34/10

Bhopal, India

2023 – 2027

EXPERIENCE

AI Engineer Intern

Esterl.ai

May 2026 – Present

Remote

- Engineered AI-powered workflow automation solutions using Python, LLMs, and OCR to streamline business operations for enterprise clients.
- Developed intelligent document-processing applications that automated paperwork and reduced manual effort by 60% across internal workflows.

Agentic AI Intern (Capstone)

Wiiz Platform

Dec 2025 – Jan 2026

Remote

- Designed and implemented a multi-agent Contract Risk Analyzer using LangChain to extract, classify, and summarize risks from legal contracts.
- Awarded **Best Capstone Project** and **Highest Workflow Creation** for delivering one of the program's top AI solutions.

Generative AI Intern

EduSkills Foundation × Google Cloud

Jan 2025 – Mar 2025

Remote

- Developed GenAI applications using Vertex AI, Gemini APIs, and RAG techniques for document understanding and intelligent information retrieval.
- Worked with prompt engineering, vector search, and structured AI outputs for document understanding.

PROJECTS

RAG Data Explorer | Python, LangChain, FastAPI, Pandas

[GitHub](#)

- Built a Retrieval-Augmented Generation (RAG) application using LangChain that enables users to query uploaded CSV datasets in natural language.
- Implemented a retrieval pipeline to provide context-aware, AI-generated insights from structured tabular data.

AI Task Manager | Python, FastAPI, React.js, langChain, Gemini API

[GitHub](#)

- Built a full-stack AI task management application using FastAPI, React.js, and Gemini API to automate task creation, prioritization, and intelligent task assistance.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

AI Engineering: LangChain, LLM Integration, RAG, AI Agents, Multi-Agent Systems, Prompt Engineering, OCR Pipelines, Vector Search, Embeddings

Frameworks: FastAPI, React.js, Next.js, Node.js, Tailwind CSS, Streamlit

Databases: MongoDB, PostgreSQL, ChromaDB, Supabase

Developer Tools: Git, GitHub, Docker, Postman, Jupyter Notebook, VS Code

ACHIEVEMENTS & CERTIFICATIONS

Best Capstone Project & Highest Workflow Creation – Wiiz Platform Agentic AI Program

Selected for Google Cloud Generative AI Virtual Internship – EduSkills & Google Cloud

Salesforce Developer with Agentblazer Champion – SmartBridge & AICTE

Data Science Master Virtual Internship – EduSkills & Altair

Deep Learning Practical with Python, TensorFlow & Keras – Samatrix.io
